Introduction to the topic :-

Online movie tickets booking is the technology for booking movie ticket with the going to cinema hall.

In this project of website designing to book the movie tickets, we are providing the movies that are going to release in this week. and we are providing the information about languages, the viewers can book the movie tickets of different languages. and we are providing the details of every movie i.e., name of director, actor and actress and the producers and etc,. in that page, and provided that the respective time that you can want to book the tickets.

Here, when we opened the website of the movie ticket booking we can see the page that is consisting of the following modules, the modules are Home, About,

Contact us, Movie, timings, and the poster of movie as movie poster.

In the home page we can see the movies which are realesed and that movie which is in the Theaters. By searching we can get the movie what we want to book to go to the Theaters.

In the module of about we can know about the details of the website and to cheak the movies that are going to realeasd in one month.

In the module of Contact us we can provide the contact number of ours and that to clarity the quarries that you having. If you are not got the tickets, but you have transfered the money to our accant; they will give the clarity about your doubts.

In the module of Timings is we are providing that the timings of the movie that is chosen by the people as per theire comport.

And the module of the movie poster in this you can see the first look of the movie and by clicking the poster we can book the movie tickets.

In the movie module we are providing the information about the movie. The details about the director and the actors.
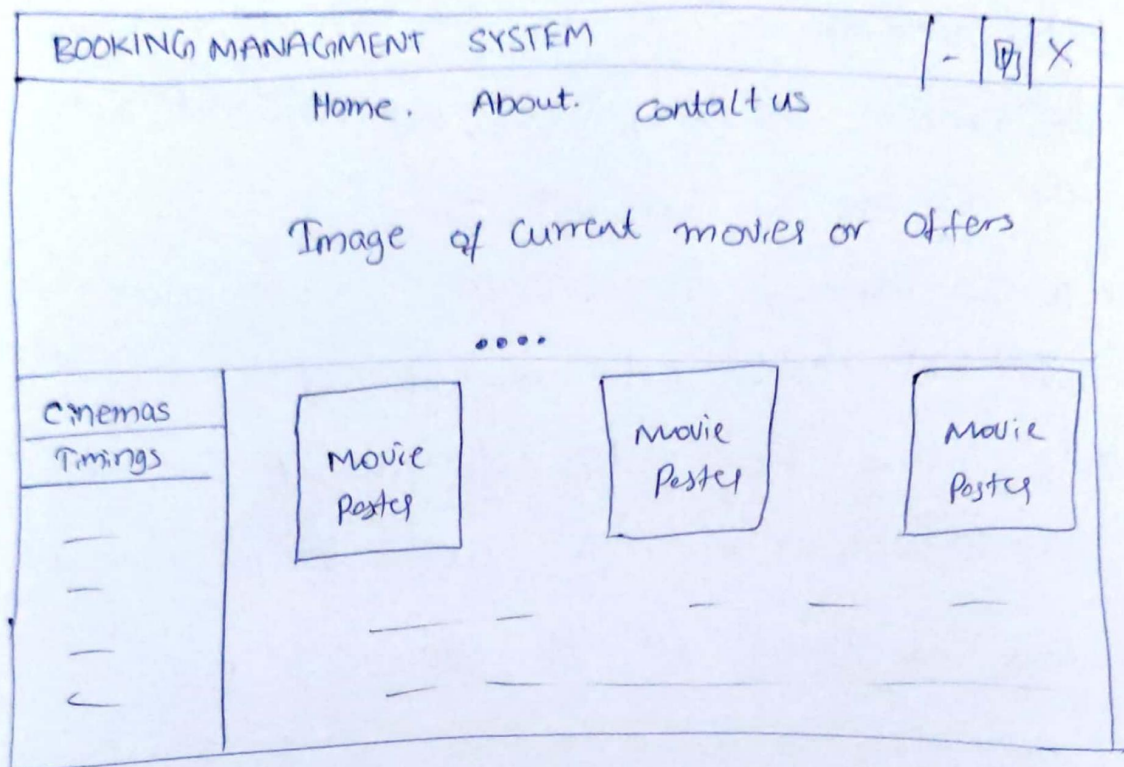

In this website to book the movie tickets there are a lot of oppurtunities were provided by the website. By this websites the we can draw the audience through the vorious kinds of movies, by using this movie reviews on the website to publish the channels and also we can tie up with big production and producers to spread word of word publicity.

Here in this project there is a lot of work to create a website. To create the website we have used the concept of HTML and CSS and JAVA script. So, that is why we shared the Coding part.

And in the Home page to show the modules we all three done to the work to show them. Module of Home and about will explain by Neboti Arun kumar, Module of movie and Contact us will explain by Harsha Vardhan reddy, and module of timings and movie poster will explain by Shashidhar reddy
